

# CHANGING THE FACE OF BODY PROTECTION

[FOMOPROTECTION.COM](https://fomoprotection.com)

# WHY FAZE?

Adjust my dial for the perfect fit.

Using DION technology our foams exceed the industry standard by up to 65%.

Our combination of textiles ensures our body protector is flexible and breathable ensuring maximum results.

Our soft-shell outers are removable, interchangeable and can be washed at 30 degrees.

Our body protector is certified BETA Level 3. All FAZE protectors are made to meet the standard.

# ABOUT US

FOMO stands for Fear of Missing Out and that's exactly what our company is all about.

Instead of FOMO because you're missing out on a night out with your friends it's FOMO because you don't want to miss out on performing at your best at the sport you love whether from injury or restrictive protection.

Common body protectors for horse riding are uncomfortable, restrictive and many riders don't believe they work. FOMO's flagship product FAZE is changing rider perception of protection. Our soft adaptable foams mold to your shape and exceed the industry standards by up to 65% making us arguably the safest at market. Not only this but our patented adjustment system and foam technologies can be adapted for multi-sector use.

We are a minimal waste company and as a Scottish based manufacturer we ensure that the highest quality products are being created with an environmental conscience.

We are committed to designing and creating innovative products, and are always pushing ourselves to think outside the box to create exciting products for our customers and are proud to already being the winner of several awards.

We believe that riders should never have to compromise on safety over comfort, however we understand that wearers need to be able to perform at their best. This is why we are leading the way in revolutionary design, bringing a body protector like no other to the market.

Why not join us on our journey and find out more.
